### **Description**

β-Agarase 118A (BpAga118A), assigned the E.C. number 3.2.1.81, is a derivative of Bacteroides plebeius. It is an enzyme that participates in the hydrolysis of 1,4-β-galactosidic linkages in agarose. The recombinant BpAga118A, purified from  $Escherichia\ coli$ , is a single-domain Glycoside Hydrolase family 118 (GH118) enzyme (see more details at ww.cazy.org). The protein is supplied in a solution containing 35 mM NaHepes buffer (pH 7.5), 750 mM NaCl, 200 mM Imidazole, 3.5 mM CaCl<sub>2</sub>, and 25% (v/v) glycerol, at a concentration of 0.25 mg/mL. Bulk quantities of this product can be made available upon request. To place an order, simply visit our website. We offer fast and secure shipping worldwide.

#### **Electrophoretic Purity**

The molecular integrity and purity of *Bp*Aga118A (GH118) were evaluated using sodium dodecyl sulfate-polyacrylamide gel electrophoresis (SDS-PAGE), followed by BlueSafe staining (MB15201) (Figure 1).

**Figure 1**. SDS-PAGE analysis of *Bp*Aga118A (GH118) was conducted in (Lane 1), employing a 14% polyacrylamide gel. The enzyme exhibits a band corresponding to a molecular weight of approximately 51,73 kDa. Lane M contains a Protein Marker for reference.

#### Storage temperature

The protein should be stored at -30°C to -15°C in a constant temperature freezer. The protein will remain stable till the expiry date if stored as specified.

## **Substrate specificity**

BpAga118A (GH118) hydrolyses agarose.

## Temperature and pH optima

The pH optimum for enzymatic activity is 6 while temperature optimum is 40 °C.

## **Enzyme activity**

The substrate specificity and kinetic properties of *Bp*Aga118A (GH118) are detailed in the referenced publication provided below. To perform enzyme assays and determine specific activity values, adhere to the methodology outlined in the cited paper(s).

### **Customer Support**

Our dedicated customer support team is always ready to assist you with any questions or technical issues you may have. Reach us via email at info@nzytech.com.

## **Quality control assay**

Protein purity is determined to be ≥90%, as assessed by SDS-PAGE and subsequent BlueSafe staining (MB15201).

For life science research only. Not for use in diagnostic procedures.
