### **Description**

Dextranase 66A (*Sm*Dex66A), assigned the E.C. number 3.2.1.11, is a derivative of *Streptococcus mutans*. It is an endo-1,6-α-dextranase. The recombinant *Sm*Dex66A, purified from *Escherichia coli*, is a single-domain Glycoside Hydrolase family 66 (GH66) enzyme (see more details at <a href="https://www.cazy.org">www.cazy.org</a>). The protein is supplied in a solution containing 35 mM NaHepes buffer (pH 7.5), 750 mM NaCl, 200 mM Imidazole, 3.5 mM CaCl<sub>2</sub>, and 25% (v/v) glycerol, at a concentration of 0.25 mg/mL. Bulk quantities of this product can be made available upon request. To place an order, simply visit our website. We offer fast and secure shipping worldwide.

#### **Electrophoretic Purity**

The molecular integrity and purity of SmDex66A (GH66) were evaluated using sodium dodecyl sulfate-polyacrylamide gel electrophoresis (SDS-PAGE), followed by BlueSafe staining (MB15201) (Figure 1).

**Figure 1**. SDS-PAGE analysis of *Sm*Dex66A (GH66) was conducted in (Lane 1), employing a 14% polyacrylamide gel. The enzyme exhibits a band corresponding to a molecular weight of approximately 96,56 kDa. Lane M contains a Protein Marker for reference.

# Storage temperature

The protein should be stored at -30°C to -15°C in a constant temperature freezer. The protein will remain stable till the expiry date if stored as specified.

#### **Substrate specificity**

SmDex66A (GH66) hydrolyses dextran  $\alpha$ -1,6 linkages.

### Temperature and pH optima

The pH optimum for enzymatic activity is 5.5 while temperature optimum is 39 °C.

## **Enzyme activity**

The substrate specificity and kinetic properties of *Sm*Dex66A (GH66) are detailed in the referenced publication provided below. To perform enzyme assays and determine specific activity values, adhere to the methodology outlined in the cited paper(s).

#### **Customer Support**

Our dedicated customer support team is always ready to assist you with any questions or technical issues you may have. Reach us via email at info@nzytech.com.

### **Quality control assay**

Protein purity is determined to be ≥90%, as assessed by SDS-PAGE and subsequent BlueSafe staining (MB15201).
